dvandyke@sequoiaproject.org or 703.864.4062

Congratulations to our Newest Participants

- University of Chicago Medicine
- Pine Rest Christian Mental Health Services
- University of Maryland Medical System (UMMS)

This brings us to 260 Participants on the eHealth Exchange!

Testing Program Reminder

Didi Davis, VP, Informatics, Conformity, & Interoperability

Content Testing Deadline - February 5, 2019

- The Content Testing Program requires Participants to submit a content sample by February 5, 2019. **Many organizations are still outstanding.**
- The content sample does not have to pass, but a sample must be submitted by the deadline.
- For more details on the program visit:
<https://sequoiaproject.org/ehealth-exchange/testing-overview/content-testing/>

Content Testing Program

Home > eHealth Exchange > Testing Overview > Content Testing

Let's Improve the C-CDA Together!

The eHealth Exchange enhanced content testing requirements launched February 5, 2018.

The Sequoia Project knows data exchange is just the beginning for successful health data sharing. We are also committed to ensuring the content of those data exchanges is both accurate and useful to providers and patients.

All participants need to complete the below survey as the first step to gain access to the content testing tools.

> eHealth Exchange Content Testing Survey / Application

Upcoming Events

Recent Posts

- The Sequoia Project to Present at ONC's 2nd Interoperability Forum
- National Patient Matching Framework Updated
- Statement on the Passage of VA Mission Act
- The Sequoia Project's CTO/ CIO Testifies Before National Committee on Vital and Health Statistics

If you have any questions about the submission, email testing@sequoiaproject.org

eHealth Exchange Carequality Implementer Status

DURSA Amendment – Current Status

- DURSA Amendment changes are still being finalized as we are still addressing the Federal Participants requirement to comply with Controlled Unclassified Information (CUI) requirements as required by Executive Order 13556 and 32 CFR Part 2002
- It has been difficult to accommodate the language within the DURSA due to the nature of the agreement and the need for additional specificity so that Participants can comply.
- The CUI requirement ultimately applies to any non-federal organization that receives data from a federal agency, which will include multiple networks and frameworks.
- We need to provide time for the eHealth Exchange to initiate a collaborative process with federal and non-federal Participants to further identify and document the specific requirements needed within the network.
- We are exploring the possibility of modifying the eHealth Exchange Participation Agreement to include the CUI language rather than include this within the DURSA.

Carequality Pilot – Current Status

- We are currently in the operations planning process, which includes:
 - Participation in the Carequality workgroups
 - Reviewing and drafting/updating eHealth Exchange policies as necessary
 - Reviewing the latest CCA and CC term updates that are currently pending and finalizing the necessary addendum

eHealth Exchange Hub – Status and Outreach Activities

- Staff will reach out to Participants to begin coordination for the hub rollout.
- Requires coordination on the modified Participation Agreement and BAA
- Information we will need to know:
 - Are your Directory entries current current for both Validation & Production environments
 - Does your organization use test patients?
 - If so, for which environment (Validation, Production, or both)
 - Are they active?

Work Groups and Task Groups

Call for Participation: eHealth Exchange Technical Workgroup

- The Thursday Joint Technical Workgroup has been sunset
- The eHealth Exchange still needs a technical forum for topics that need to be discussed
- We are targeting **February** to activate the Technical Workgroup to address a few outstanding issues.
- The group will meet Thursdays at 3p ET. A notification will be sent to participants when the group begins.

Current Topic

- Adjusting the eHealth Exchange IHE XCPD Patient Discovery specification to support RLS (section 3.1.7, page 12 of [Patient Discovery v2.0](#))
