- Opioids
- PI

DaVita
Arun Gopalan

DaVita

Organization Background

- Leading provider of Kidney Care services, including in over 2600 dialysis centers

- National footprint in the U.S.; Over 200,000 patients

Goals of Interoperability

- Improved Care Coordination between different care settings leading to better Clinical Outcomes for Patients

- Better Patient & Clinic Experience

Primary use of Data

- Transitions of care – patients going into acute settings for treatment and transitioning back into dialysis

Social Security Administration
Jude Soundar

Health IT at SSA

- Social Security Disability Statistics
  - 2.5 million initial disability applications per year
  - About 15 million requests for medical information each year
  - 500,000 sources: doctors, hospitals, schools, third parties
  - $600 million in payment for medical information

- Deliver quality Social Security services to the public

- Expand Health IT interoperability to expedite disability determinations
  - To improve service, SSA leverages technology in all aspects of claims development
  - Health IT is proving to be one of the most valuable tools
