Why Data Quality? Why Now?

© eHealth Exchange. All Rights Reserved.

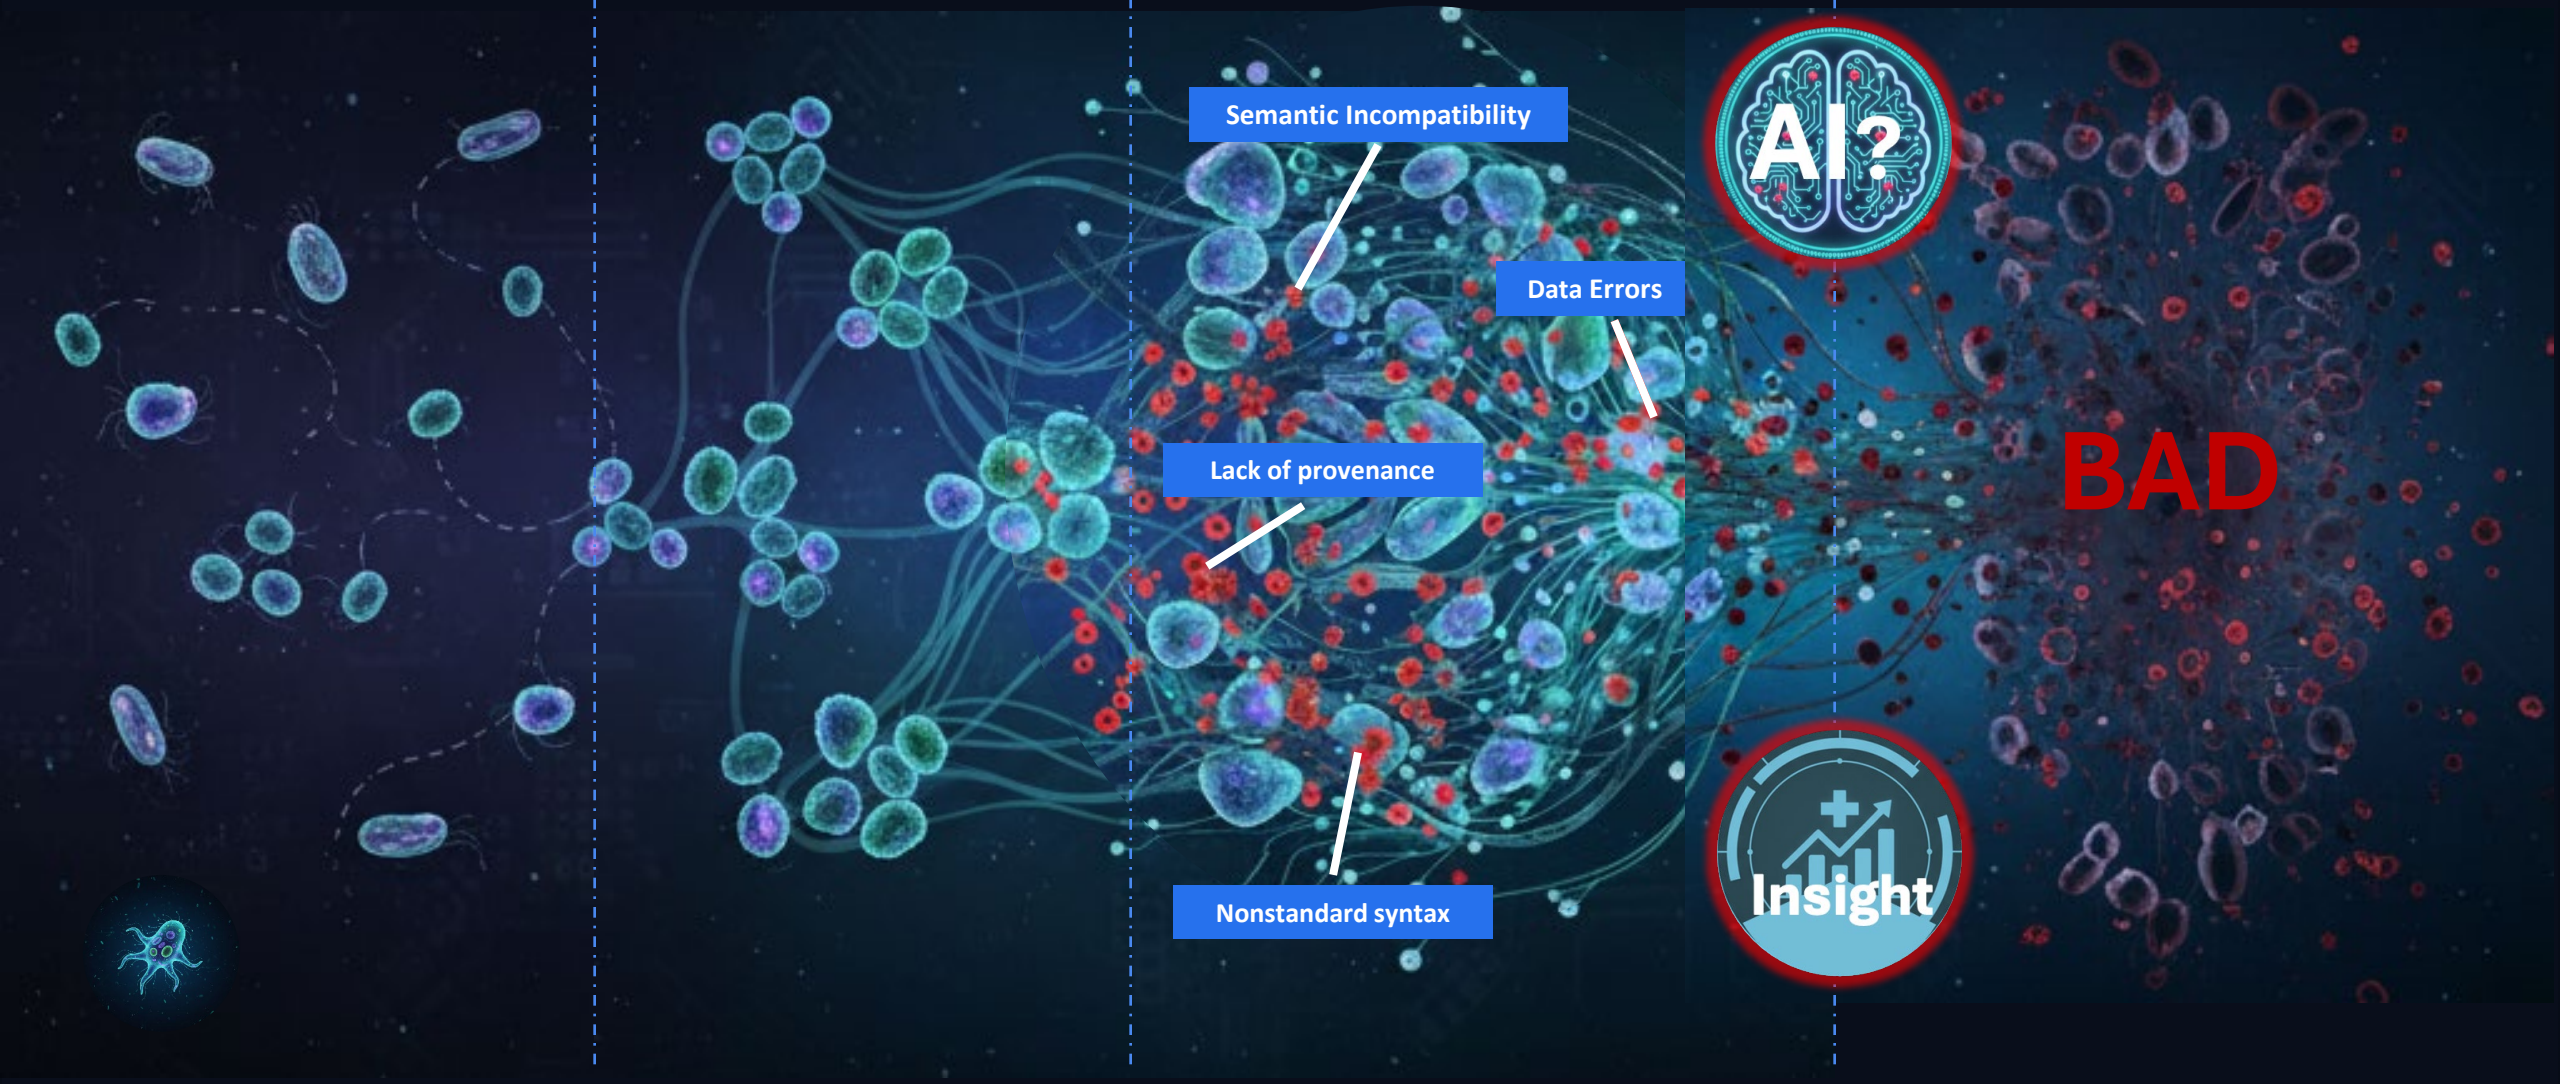

What is everyone talking about data quality?

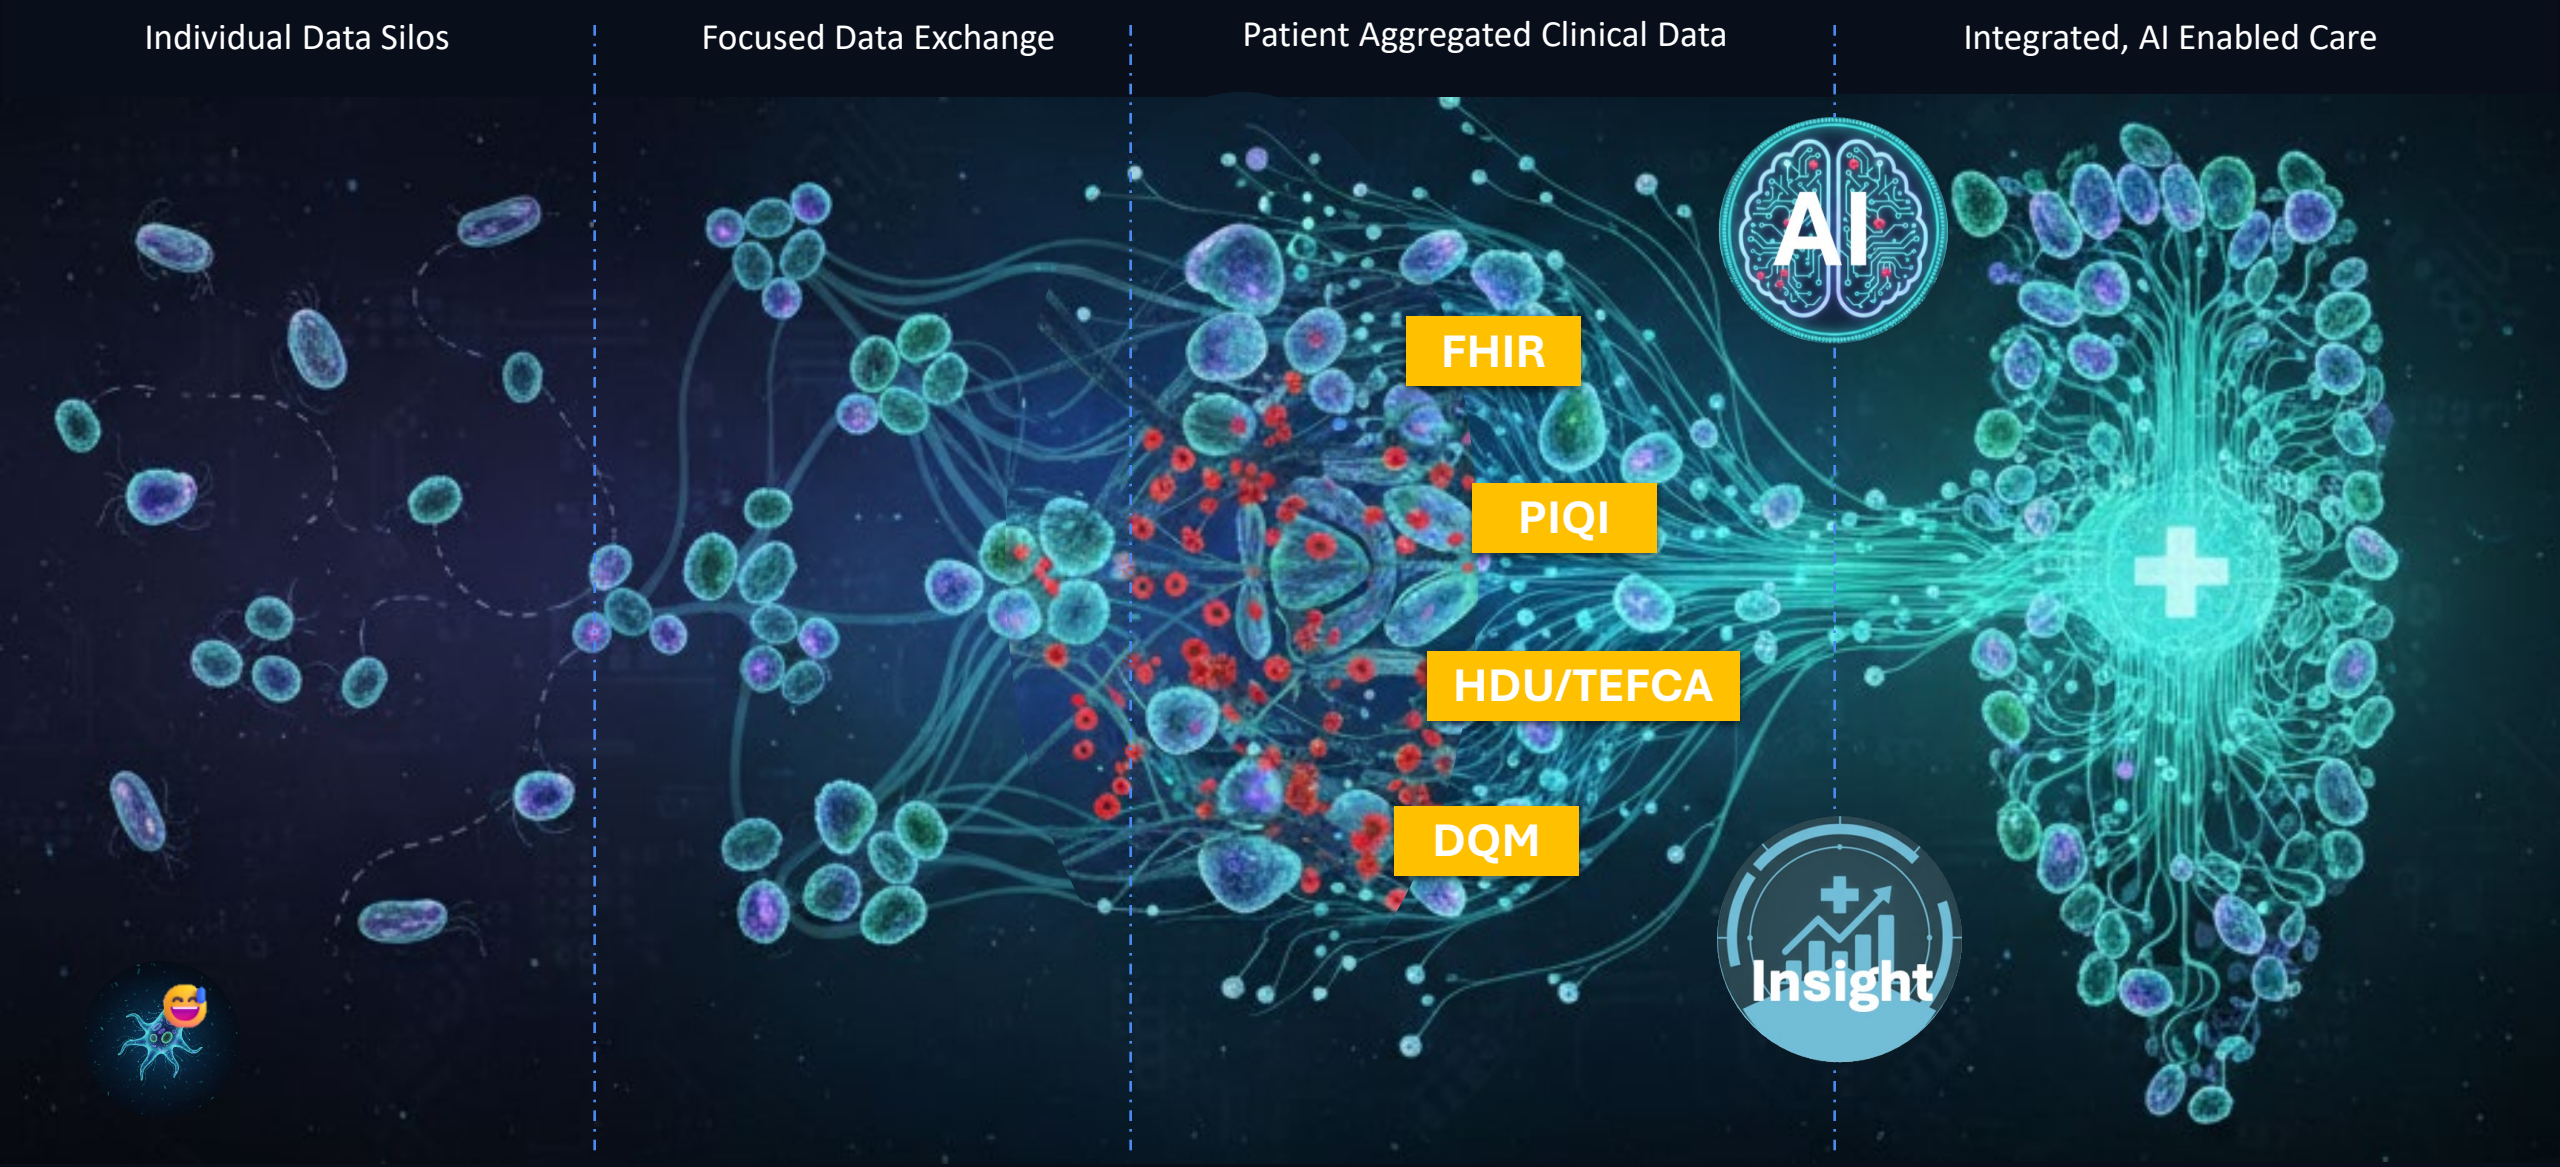

What is everyone talking about data quality?

What is everyone talking about data quality?

What is everyone talking about data quality?

Healthcare Interoperability

Making the right information securely available, to whoever needs it to make a decision, regardless of where that information originated, in a usable form.

TEFCA / HIE / HDU

People, governance, policy and trust alignment

Standards (HL7/X12/NCPDP)

Common language and structure for the payload

QHIN, HDU, HIE

Discovery, identity, trust, authorization and exchange

The Data

Poor quality, inconsistent, incompatible
